Policy circular on Alternate source of energy & energy conservation

Date:- 12/10/2022

As per the governing body meeting held on, the management is decided to provide the following facilities of using **SOLAR PANELS & LED BULBS** in college campus.

1. Solar energy:- It is the radiation from the Sun capable of producing heat, causing chemical reactions, or generating electricity. The total amount of solar energy received on Earth is vastly more than the world's current and anticipated energy requirements.

2. Wheeling to grid:- In electric power transmission, wheeling is the transportation of electric energy (Mw-hours) from within an electrical grid to an electrical load outside the grid boundaries.

3. Use of LED bulbs/Power efficient equipment:- The entire block is lit by LED light. All the lights of central library on the ground floor is replaced with LED lights.
